Team ID	Individual
Project Name	India's Agricultural Crop Production Analysis (1997-2021)
Maximum Marks	2Marks
Name	YERESI VENKATA RAMAGOPAL REDDY

Customer Problem Statement Template:

PROBLEM STATEMENT-1:

I am (Customer)	An agricultural officer, researcher, or policymaker.
I'm trying to	Analyze agricultural crop production data to identify production trends, crop performance, and state-wise agricultural growth.
But	The agricultural data is large, spread across multiple years, and difficult to analyze manually.
Because	The data is not presented in a clear and interactive visual format, making it difficult to identify patterns and compare production across states and years.
Which makes me feel	Frustrated because it takes a long time to make informed agricultural planning and policy decisions.

PROBLEM STATEMENT-2

I am (Customer)	A farmer, student, or agriculture enthusiast.
I'm trying to	Understand crop production trends, seasonal patterns, and the performance of different crops across India.
But	The available agricultural reports contain large amounts of data that are difficult to interpret.
Because	There is no simple dashboard to visualize production, yield, and state-wise agricultural performance.
Which makes me feel	Confused and unable to make quick, data-driven decisions or gain meaningful insights.

Example:

I am (Customer)	An agricultural researcher.
I'm trying to	Analyze India's agricultural crop production data from 1997–2021 to identify production trends and high-performing states.
But	The agricultural dataset is large and difficult to interpret manually.
Because	The data is not available in an interactive visual format for easy comparison and analysis.
Which makes me feel	Frustrated because I cannot quickly identify trends or make data-driven agricultural recommendations.
