

PROJECT DESIGN PHASE

PROBLEM -SOLUTION FIT

Date	06-7-2026
Team ID	Individual
Project Name	India's Agricultural Crop Production Analysis (1997-2021)
Maximum Marks	2Marks
Name	YERESI VENKATA RAMAGOPAL REDDY

Problem–Solution Fit

Problem:

Agricultural crop production data is available in large datasets, making it difficult to analyze production trends, compare states, and identify high- and low-performing crops. Raw data alone does not provide clear insights for decision-making.

Solution:

The project uses Tableau to transform raw agricultural data into an interactive dashboard with KPIs, charts, maps, and filters. This enables users to analyze crop production trends, compare state-wise performance, and gain meaningful insights for better agricultural planning and decision-making.
